TO WHOM IT MAY CONCERN

Having bought a block of land with the purpose of building an investment home, we looked for someone to design an individual home with passive solar features.

We were most fortunate to find Dave Lawrence of Bryon Energy Efficient Homes. There were three of us involved in the planning with Dave and many miles between us all. Dave spent considerable time gaining an appreciation of our block of land and our concepts through face to face meetings and the sharing of many email drafts. We settled on a great energy efficient plan in reasonably short order which then moved through Council in a very acceptable timeframe.

Dave was very helpful, organising surveys and engineering plans as required. He constantly kept in touch.

Once building commenced, Dave visited the site on a number of occasions to watch his plan materialise. Earlier this year, having gained occupation of the house, Dave and his wife visited to view the finished product.

We have gained a friend through this process.
