Byron Bay NSW 2481

I have used Dave Lawrence for 2 residential building projects in Byron Bay over the last 8 years. Dave is a personable, knowledgeable and creative designer who manages to meld his fine craft with the cold realities of building restrictions and budget constraints.

Dave uses a very patient and understanding approach to proposing ideas which lends itself to a more collaborative end result between client and designer.

He is very honest and open about environmental plans, building codes, development applications and budget realities which adds some comfort and truth to what can be a complicated and stressful process.

I use Dave's services because he can deliver the whole package through council. I like his approach and his design quality and he ticks all the boxes thus leaving little room for unpleasant surprises.

I will continue to use Dave Lawrence's services for my projects because he makes the whole process coherent, pleasurable and user friendly.
