

Reference for Dave Lawrence from Byron Energy Efficient Drafting.

28 May 2012

Dear prospective home builder/renovator,

My wife and I completed the ACE course conducted by Dave and gained enormous benefit in understanding the difference between common building design and good solar passive design.

When we purchased a house in disrepair in Billinudgel we contacted Dave and engaged him and Ruth to assist us in a cost effective renovation. The advice and recommendations were fantastic and the cost/benefit analysis was outstanding. We now have a light filled home that does not need cooling and uses one heat source for whole home heating.

We were so impressed with his work that we engaged him again to assist in the renovation of our studio. That too, went swimmingly.

We would not hesitate to recommend Dave and commend him on his ability to provide options and further explore and revise those options throughout the design process.

Kind regards,

Kelvin and Skai Daly

Billinudgel NSW 2483.
